#### SUPPLEMENTARY INFORMATION:

*Title:* Poultry Imports and Exports.

*OMB Number:* 0579-0141.

*Expiration Date of Approval:* January 31, 2000.

*Type of Request:* Extension of approval of an information collection.

*Abstract:* The regulations contained in 9 CFR, chapter 1, subchapter D, parts 91 through 99 (the regulations), govern the importation of animals, birds and poultry, certain animal products, and animal germ plasm into the United States.

The regulations restrict the importation of poultry meat and other poultry products from regions of the world where exotic Newcastle disease (END) is known to exist.

Among other things, the regulations provide for the importation of poultry carcasses, and parts and products of poultry carcasses, that originate in a region free of END but are processed in a region where END exists. These carcasses, and parts and products of carcasses, are not required to meet the more stringent requirements imposed on products that originate in regions where END exists, provided they are processed and shipped under specified conditions.

These conditions include four information collection activities: a certificate of origin that must be issued, serial numbers that must be recorded, records that must be maintained, and cooperative service agreements that must be signed. These information collection activities support our efforts to ensure that imported poultry carcasses pose a negligible risk of introducing END into the United States.

We are asking the Office of Management and Budget (OMB) to approve the continued use of these information collection activities.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning these information collection activities. These comments will help us:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

*Estimate of burden:* The public reporting burden for this collection of information is estimated to average .1470 hours per response.

*Respondents:* Full-time, salaried veterinarians employed by the governments of various regions that are affected with END.

*Estimated annual number of respondents:* 4.
